a variety of lengths

Features

- [Unique Four Times Locking Mechanism](#)
- [Tamper Evident and Resistant](#)
- [Environmentally Safe](#)
- [No Tools Required for Installation](#)
- [Body made of Polycarbonate for Long Term Life and Weather Resistance](#)
- [Standard Clear Body Reveals Tampering.](#)
- [Dispatched Assembled and Ready to Install](#)
- [Tamper proof even on Boiling water dip](#)

The QUADLOCK seals are made of High Grade Polycarbonate material (*Grade LV-20 of M/s. DuPont, Singapore or Grade R123 of M/s. GE Plastics*), which is far ahead, then conventional Polypropylene as the polycarbonate poses high melting point and great tensile strength apart from long life of 20 years and more. The presence of **four times locking mechanism** gives this seal an extraordinary edge over other plastic seals. The presence of Quad locking mechanism makes sure that seal cannot be tampered

WIRE OPTIONS: Multithreaded wire of INOX & Nylon with INOX wire. (*Can not be joined back by soldering etc.*)

CONSECUTIVE NUMBERING: Non repeating 7 digit sequential numbering is done in Black Color, totally indeleble.

Personalization: LOGO and confidential codes can be molded during manufacturing process for personalization.
